

expectation loves surprise

Discover the diverse career opportunities offered by the world's leading chemical company. www.basf.com/career

BASF
The Chemical Company

As the leading company in the chemical industry, we open up future success potential together with our partners. For this purpose, we foster and develop partnerships that are marked by trust and mutual respect. With intelligent solutions, we help to make the future successful and sustainable. We set store by the strengths of our staff.

For our Experimental Toxicology and Ecology we are looking for a committed

Head of laboratory for toxicological studies (m/f)

Your future tasks:

- Lead and manage a laboratory with several co-workers
- Conduct, evaluate and report toxicological studies under GLP conditions
- Participate in the scientific development in toxicology and establish new methods
- Represent BASF in international scientific panels

What we expect of you:

- Degree and doctorate in natural sciences
- Familiar with toxicological studies
- Fluent English skills and (preferably) a working knowledge of German
- Communication and computer skills
- Be disposed to interdisciplinary collaboration and team work
- Leadership and management skills

What we offer:

We provide intensive "on the job" training in a competent team and help you to find challenging opportunities to develop your career further on in a global enterprise.

We look forward to your application!

Dr. Bennard van Ravenzwaay,
